Flintlock Pan					4F		

### Conical Projectiles

Conical projectiles must be loaded without patches. If they are not purchased prelubricated, they must be greased with Traditions™ WonderLube or any commercial black powder bullet lube.

The most accurate load for a conical projectile is usually 5 to 10 grains above those for round balls. Maximum powder loads\* for these projectiles in each caliber are identical to those noted above for round balls.

**Conical projectiles must fit tightly.** (See *Recommended Loads*):

\*Commercial grade black powder designed for muzzleloaders should be used. The only other propellant which may be used in Traditions™ percussion rifles is Pyrodex® RS (Rifle and Shotgun Powder) and P (Pistol Powder) for use in Traditions™ percussion pistols. (Pyrodex®, is not recommended for flintlocks.) Pyrodex® produces approximately the same results as an equivalent volume of black powder. Therefore, the recommended charges apply to Pyrodex®, if a powder measure graduated in grains (as most powder measures are) is used.

### PROPELLANTS

1. Cannons or very large-caliber rifles - we recommend 1 f/fg (coarsest granulation) black powder or Pyrodex®.
2. .45 to .58 caliber rifles - we recommend 2 f/ffg (coarse granulation) black powder, Pyrodex®. RS or Pyrodex®. Select.
3. Revolvers, pistols, and .38 caliber - 3 f/fffg (standard granulation) black powder, Pyrodex®. P.
4. Flintlock primer - 4 f/ffffg (finest granulation) black powder.

Store all propellants according to the manufacturer's instructions listed on each container. Local fire regulations should also be followed.

## **PERFORMANCE FIREARMS**

### **LIMITED LIFETIME MECHANICAL WARRANTY**

Traditions™ will warrant this muzzleloading firearm (or parts if a kit) to be free of mechanical defects in materials or craftsmanship for the life of the firearm, while in the possession of the original owner. Traditions™ will repair or replace, at its option, product or parts which are returned at owner's expense to the Traditions™ Customer Service Department. A full explanation of the specific problem must accompany the returned item. Incidental and consequential damages are not covered by this warranty. Wood parts and corrosion damages are not warranted due to the inability of Traditions™ to control use and storage conditions.

This warranty shall be considered null and void if any of the following conditions are determined by the Traditions™ Customer Service Department.

1. Use of any propellant other than black powder or Pyrodex®.
2. Use of any powder charges in excess of those recommended in published Traditions™, shooters instructions.
3. Removal or movement by the owner or gunsmith of the breech plug or barrel bolster drum.
4. Modification of internal parts as they were shipped from the factory.
